

WHEN TREES ARE PLANTED IN AFRICA, IT BENEFITS NOT ONLY AFRICA BUT ALSO EUROPE.
LET'S PLANT TREES FOR OUR PLANET AND FOR A GOOD FUTURE FOR ALL!

MAMADOU MBODJI
PRESIDENT OF THE NATUREFRIENDS AFRICA-NETWORK AND VICE-PRESIDENT OF NFI

TOGETHER FOR CLIMATE JUSTICE

NATUREFRIENDS CLIMATE FUND

NATUREFRIENDS FOR CLIMATE JUSTICE – WHY?

The climate crisis affects us all. However, those most severely affected are the people in the least developed countries of the Global South, who contribute little to global greenhouse gas emissions but lack the resources to mitigate the effects of the climate crisis.

Many regions of the African continent are particularly affected. Without effective measures, survival there will become increasingly difficult, and people will lose their livelihoods. Climate justice is urgently needed to ensure a future for people in their own countries.

Solidarity is a core value of the Naturefriends movement and is what makes us different from most other non-profit organisations. Every donation to the Climate Fund brings this value to life!

NATUREFRIENDS CLIMATE FUND – YOUR DONATION MAKES A DIFFERENCE!

Donations to the Climate Fund are an effective contribution to climate justice. Travel - especially air travel - is associated with particularly high emissions. Donations to the Climate Fund are one way to offset these emissions.

With these donations, African Naturefriends associations carry out projects for climate protection and to improve living conditions. The project teams work closely with people in the villages and focus on education as well as on the participation and empowerment of young people and women.

Donations go directly to the projects without any deduction for administrative costs. These projects are selected and monitored by an international steering committee and visited as part of Naturefriends trips.

TREES FOR THE FUTURE PROJECTS WITH AN IMPACT

At the heart of the current Climate Fund projects is the planting of fruit trees as part of environmental education initiatives with schools in Mali, Senegal and Togo. The children and their families are also trained in caring for the trees and look forward to harvesting the first fruits soon.
